fine

T-LAB FINE NEEDLE

Highly corrosion-resistant, this needle, significantly minimize bleeding and bruising below the level of bare minimum. It offers optimum comfort to patient during the course of injection.

This needle falls within the high price-performance ratio category with its high resistance corrosion as well as the injection comfort it provides.

T-Lab Fine Needle is made of hard Japanese steel that resists blunting. The micro-polishing technology offers a superior sharpness and ultra thin wall structure, with its 30% thinner outer diameter and 60% wider inner diameter than 30G needles it minimizes the effects of bleeding, bruising.

MEASUREMENTS

Our needles come in two different length, 4mm and 13mm..

- 30G → 4mm / 13mm
- 33G → 4mm / 13mm
